

Turning Points Homework

1) Find the co-ordinate of the turning point:

$$y = (x + 4)^2 - 12$$

2) Find the co-ordinate of the turning point:

$$y = x^2 + 8x + 24$$

3) Find the co-ordinate of the turning point:

$$y = x^2 - 3x + 19$$

4) Find the co-ordinate of the turning point:

$$y = 2x^2 + 10x + 17$$
